

Aylesbury High School for Girls Fire Compliance Project

SOLUTION PROVIDED

A comprehensive refurbishment project, helping the school achieve effective fire compartmentation by replacing existing non-compliant doors.

Works addressed the internal structural fire resistance of the building as well as providing full fire compartmentation to delay the spread of flames and provide a safe means of escape.

Removal of non-compliant timber door sets

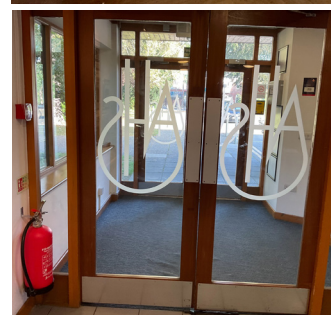

- Replaced with oak veneer FD30s door sets
- Incorporating 7mm Pyroshield glazing
- Solution also included hardwood fan and side light framework.

Associated Ironmongery - satin stainless steel

- 8 No. Twin Ball Race Hinges
- Push Plate
- D Handle
- Kick Plate (back & front)
- Cam-Action Door Closer.
